What is Label2Earn?

Label2Earn (L2E) is a new kind of project in crypto domain, which will produce accurate and large datasets for artificial intelligence (AI) systems. L2E project will provide users the opportunity to earn L2E tokens by using the mobile App, the project website and/or python codes. L2E project will make the AI dataset generation task, simpler and more accurate than ever. For example, object cropping in an image can be done as a simple drawing task. Users will draw a line around the object and the system will convert that to a Label for an AI model.

ABOUT L2E PROJECT

When users decide to be a participant in L2E project, they will have level 0. Level 0 means training phase. In the training phase, our system will teach our users how to draw lines accurately. They will be asked to re-draw on some images and the results will be checked by the system. All users will earn L2E tokens during training phase. In the case of accurate results, our users will gain a new and higher level. Higher level means more benefits and earning. When some users have gained higher levels, they can be considered as experts. The expert users can now label new dataset for our customers and earn more and more L2E tokens. Based on our initial tests, the expert users can label new datasets with better accuracy compared to automated labeling tools and free labeling toolboxes. And of course, with a large number of expert users we can produce AI datasets faster than any other system in the world. There are so many amazing ways artificial intelligence and machine learning are used behind the scenes to impact our everyday lives. AI assists in every area of our lives, whether we're trying to get driving directions, get music or movie recommendations, Self-Driving and parking vehicles. Self-driving and parking cars use deep learning, a subset of AI, to recognize the space around a vehicle. Nowadays, deep learning systems have been employed in following areas:

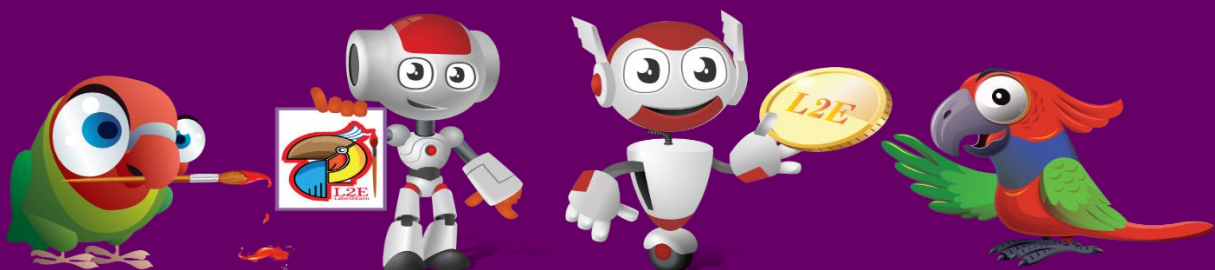

- Object detection and tracking
- Autonomous vehicles
- Translate apps
- Facial recognition, real-time sports tracking
- Healthcare, Agriculture, Manufacturing
- Image annotation, Image to text (OCR)
- Deep fake, deep image and video generation
- Predicting market and weather
- etc.

One of the most tedious parts of creating an AI system is actually gathering the dataset that you'll be training your models on. L2E project will guide our customers through the process of generating their AI systems by gathering large and accurate training datasets very quickly. Our customers can be (but not limited) as the following list:

- Software Companies
- Startups
- Universities
- Offices and institutions
- Factories
- etc.

L2E project will generate new datasets with international data quality standards for AI, machine learning and deep learning systems. L2E project follows all the international data security standards to ensure the privacy and confidentiality of data at every level gaining the trust and confidence of our customers.

At the other hand, after training our L2E users for labeling datasets accurately, we will generate new datasets for ourselves by using about 5% of total supply. Then we will create several AI systems using these new datasets and deploy the systems as rest APIs. All customers can pay L2E token and use these systems instead of generating their own AI systems. Therefore, they can save their time, efforts and money. Generally, the paid tokens for using our APIs (generated AI systems) will be used to create new datasets by the L2E users.

TOKEN INFO

- Official Contract: [0x3B99600EE142D38313EC7A0eBa27fA687F9c3717](#)
- Network: Binance Smart Chain (BSC)
- Total Supply: 256,000,000 L2E
- Symbol : L2E
- Name : Label2Earn
- Decimals: 18

➤ Audited & KYCed

- Website: <https://Label2Earn.com/>
- Telegram: <https://t.me/L2EOfficial>
- Twitter: <https://twitter.com/Label2Earn>
- Email: Team@Label2Earn.com; Label2Earn@gmail.com;

TOKENOMICS

TOTAL SUPPLY 256 million

- **Reward for users** (7 %) will be locked for 1 month.
- **Ecosystem** (8 %) will be locked for 3 weeks.
- **Marketing & Team** (5 %) will be in owner wallet for airdrop and marketing.
- **Private Sale** (10 %) will be sent for private investors.
- **Presale & Liquidity** (50 %) will be used for presale and liquidity. The liquidity will be locked for **1000** days.
- **Burn** (20 %) will be burned before launch.

Tax Structure

- L2E **buy** Tax is 3% (for marketing and development).
- **Transferring** between wallets Tax is 3% (for marketing and development).
- L2E **sell** Tax is 7% (3% Liquidity, 1% Burn, 3% Marketing/Development).

ROADMAP

- ✓Design Logo and Website
- ✓Design Mobile App (Ver 1)
- ✓Server Side Development
- ✓Create Smart Contract

- ✓Contract Audit
- ✓Listing on CookieSale
- ✓KYC badge
- Listing on Pancakeswap

- Server Side Improvement
- Mobile App Improvement
- Design GUI for New Datasets
- Listing on CoinMarketCap

- 1,000+ Expert Labeling Users
- Create First L2E Dataset
- Create Test API Web-Service
- Find Labeling Customers

- Create Dataset Marketplace
- Listing on other Exchanges
- Create Main API Web-Service
- Top 1000 on CoinMarketCap

- L2E System Improvement
- Labeling new Datasets
- New Labeling Customers
- Top 500 on CoinMarketCap

DATASET MARKETPLACE

We will create our own datasets by the help of L2E users. Then we will use these new datasets for creating API web services. At the other hand, we will sell these datasets to our customers.

Object Cropping

Object Bounding Box

Face and Landmarks

Human Pose
